

You already know the power of Microsoft Lync with functionality such as instant messaging and the ability to dynamically communicate with fellow employees. When it comes to business critical communication, enhance your collaboration by using your voice. Lync with Voice greatly increases your effectiveness and is more personal. Don't trust just anyone to deliver you world wide coverage, trust ABC with its expansive coverage in over 50 countries. A simple to implement and ultra-reliable Lync with Voice solution,

Leverage the integration between Lync, Microsoft's enterprise IP voice, instant messaging, video conferencing solution and Skype, the popular consumer communication service. Hosted VoIP with Lync removes communication barriers between work and home by sharing Lync and Skype contacts, initiating audio calls and instant messages across both platforms.

Hosted VoIP with Lync enhances Lync's capabilities with reliable, world wide coverage for voice and access from supported mobile devices.

With hosted VoIP with Lync, users gain access to a full range of telephony features without having to leave the Lync environment with which they are acquainted. Enhanced flexibility with mobility that provides an in-office experience and gives your employees access to your corporate and customer network anywhere.

Supports both small business and large enterprise needs with the broadest range of communication features available. Robust call control and support for a wide range of innovative desktop devices and applications. VoIP with Lync does it without the need to integrate third party components so you avoid costly upfront infrastructure, setup complexity and increased support costs.

Benefits of Hosted VoIP with Microsoft Lync

Microsoft Lync offers many benefits to you and your employees.

Adding voice enabled services expands these benefits to offer a complete solution.

- Hosted VoIP with Microsoft Lync delivers high-value communication and collaboration services to businesses.

- Hosted VoIP with Microsoft Lync saves businesses hard dollars on conferencing, travel, real estate and IT administration costs. It also maximizes individual productivity and fosters better team collaboration.

- Hosted VoIP puts people at the center of the communications experience. Lync provides a consistent, single client interface for presence monitoring, instant messaging, voice and video conferencing along with screen sharing for a great meeting experience.

- Experience our hosted service which is differentiated from any other UC solution in the industry. Pair our Industry leading control panel with Lync's best-of-breed integration within the Microsoft Office Suite.

Why Hosted VoIP With Microsoft Lync?

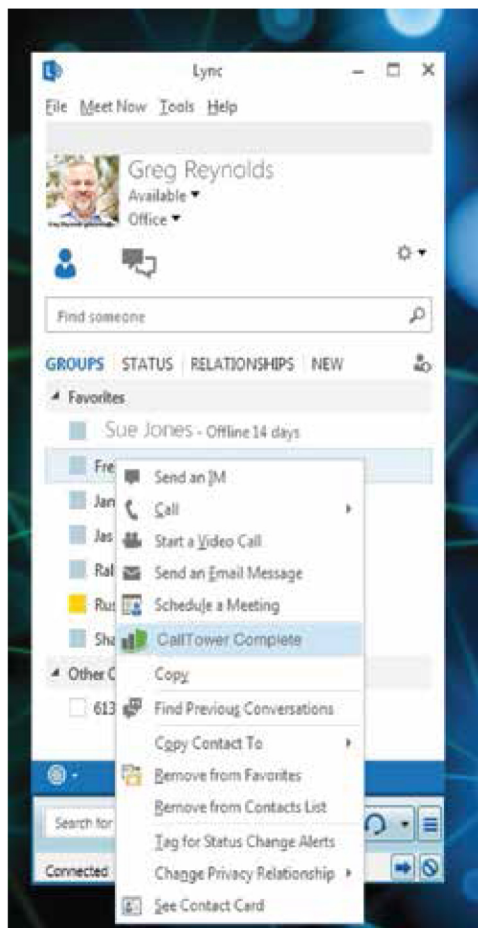

Global Access

...to offer the access to the world. ABC created a more powerful Microsoft Lync by combining a hosted version of the service along with connectivity through a world wide PSTN gateway.

With Lync, organizations have the power to quickly and easily customize Lync features to personalize the service making it a better fit for individual users. Individual fit and control means increased usage and better adoption.

Customization

With hosted VoIP with Lync, organizations have the power to quickly and easily customize their own experience meeting their unique needs. calltower:connect also extends this flexibility to the employee level, increasing adoption and efficiency.

Conferencing

Lync Conferencing without Reservation - Real Time, Reservation-less Conferencing built right into Lync. Manage your Conference ID and Leader PIN from within calltower:connect.

Contact Center

Lync with Contact Center – Experience integrated, cost effective Contact Center solution built with ComputerTalk ice.

Reliability

You can rely on Hosted VoIP with Lync. We engineer for high availability and call volume growth, which means you can rely on your communications at all times. Redundant switches and circuits along with fail-over services ensure you have the highest up-time possible.

Superior Implementations

Professional Implementation – Count on a clean implementation and setup of Lync. Our professional experts have deployed thousands of users and will ensure your success.
